Champion is a high quality manufacturer of Dragon Boats made to IDBF Specifications – models 1222 (22 crew) and 912 (12 crew). Champion is a major producer of Boats for the Chinese domestic market and were the first Chinese Boat manufacturer to make IDBF Spec Racing Dragon Boats.

These premium quality boats are constructed with a two part mould. This allows for moulded interior features such as non-skid decking and interior hand holds to safely lift the boat. The boats are constructed using fibre-glass and polyester resin for durability and low maintenance.

The boats made for the 2011 IDBF World Championships are of the highest quality and their construction includes a sandwich core, giving greater rigidity to the boat. Wood is used for the gunnels and seats.
